

Excellence. Realized.

Excellence. Realized.

Over the years, PPG Industrial Coatings has earned a reputation as a leader in the marketplace for innovative, high-performance products, world-class service and color expertise. PPG continues to build this reputation of excellence today, working with the world's top designers and manufacturers to ensure their projects fall nothing short of exceptional. With an unparalleled range of products for every industrial market, PPG guarantees substrates will receive exceptional protection that exceed goals in style, sustainability and budget.

Commitment to Sustainability

Manufacturers are looking for solutions that enhance production efficiency while remaining eco-friendly. PPG Industrial Coatings are available in environmentally friendly formulations designed to exceed global and regional environmental requirements. PPG offers industrial coatings that allow customers to reduce their hazardous air pollutant emissions and is committed to continually developing products which meet specific applications. PPG Industrial Coatings manufactures environmentally responsible products that use less energy and utilize better application processes. **Tomorrow. Realized.**

Global Reach, Local Expertise

No matter where products are designed and manufactured, PPG's coating experts are on hand to ensure success. Leading OEMs and applicators use PPG's global coatings platforms to ensure that their products meet the same performance requirements, no matter where the finishing process is located.

PPG Industrial Coating's reputation for being an honest, fair and reliable partner with which to do business is one of its most valuable assets. PPG consistently delivers on customer commitments and stands behind its products, making PPG the most trusted coatings supplier in the world. **Service. Realized.**

Performance Promise

PPG Industrial Coatings' product managers and technical specialists work closely with OEMs and coatings applicators to ensure that our coatings not only meet all performance requirements but are also applied without any problems. PPG experts guide customers through product application, laboratory testing, operational troubleshooting and process design to maximize uptime and contribute to lower overall cost. **Results. Realized.**

Technology Leadership

PPG continuously develops innovative products which enhance customers' revenue streams through new aesthetics, enhanced performance properties and increased application efficiency. PPG has an integrated global team of professional color experts, chemists and technical application experts to help manufacturers turn new coatings technologies into viable products which will integrate seamlessly into global supply chains. **Innovation. Realized.**

Market-Specific Experience

PPG Industrial Coatings serves a wide range of industries. From protective to decorative to industrial applications, PPG's technical experts bring experience and resources within each market to provide solutions that work.

Auto Parts & Accessories
